

Product Data Sheet

MONUMAT ENTRANCE MATTING

ALPHA BRUSH 1

This profile utilises an aluminium tread rail with a flexible rubber joiner. The rubber joiner can be punched with specially placed holes to assist in the drainage of the mat well area. The system comes complete with a 31mm course carpet insert and an ideal profile for use in educational facilities, commercial buildings and retail outlets where water drainage is a priority. Brush is a synthetic fibre which is made to imitate natural Coir. The synthetic nature of the insert combined with rubber backing results in a highly durable product. Suitable for both internal and external applications. Ideal for locations that require a natural look and feel or Federation refurbishments.
